MEET ME

PHOTOS

## COLLECT {MOMENTS}

**I want** to change the world by finding joy in the details, making it better one small step at a time. In 2014, I realized I could do this by beginning my photography business. I began by capturing senior photos for peers, giving many the chance to have professional photos for the first time.

**I study** finance and informatics at the Indiana University Kelley School of Business. As a direct admit and a recipient of a Hutton Honors scholarship, I'm motivated to stay on top of a challenging but focused schedule.

**I experienced** a year serving as a volunteer tutor in a local kindergarten classroom, a transformative opportunity provided to me as a member of Key Club. At IU, have enjoyed getting connected with the Habitat for Humanity program as well as being a volunteer usher at the auditorium.

**I love** reading long books, cooking new recipes, and writing letters to close friends. Although I am enjoying my time at Indiana University, I am thrilled to be able to look ahead to internships and a career in the tech or financial services sectors.
